- * 2" Bulldog Coupler
- * Swivel Jack, Tongue Mounted
- * Light Weight & High Strength All In One

Our 10" deep top storage area offers a large carpeted and lighted area for your convenience. Gas charged struts raise the lid and hold it open for you. Our unique design on the top storage lid allows the top to be opened from either side to allow you full access to all of your gear. We have also redesigned and resized the Schutzhund model to give you a lower profile and less wind resistance.

Our all aluminum framework offers tremendous strength while being light in weight. The aluminum framework also offers an unmatched resistance to corrosion that is not available with steel frame trailers. The outer aluminum skin will stand up to years of use and weather and is much more impervious to UV rays than plastic or fiberglass. We trap a full 3/4" inch of polyisocyanurate insulation between the inner aluminum liner and the outer aluminum skin in the stall area to give your dog an extremely strong and comfortable trailer.
